

Transfer Factor Short Story

It's been around forever.
It's made by the immune system for the immune system.

In 1949, Dr H. Sherwood Lawrence an Immunologist at University of New York, made a very significant discovery. In the process of studying tuberculosis, he discovered there was a “library of stored information” in the white blood cells.

Further investigation showed him that these “messenger molecules” must contain “factors” that made it possible to “transfer” the donor’s immunity to the recipient, from one source to another. He called them “transfer factors”.

When a mother is preparing to give birth, she makes an abundance of “transfer factor messenger molecules” in her pre-maternal milk.

As she breastfeeds her new born baby, she passes on her own intelligent immunity, to educate her baby’s inexperienced immune system.

In fact she passes on all the info and vital knowledge her immune system has gained during her lifetime, via the “transfer factors” in her breast milk.

In the 1990’s while researching for answers to his own respiratory condition, David Lisonbee unearthed an obscure patent that made reference to these “transfer factors”.

He then discovered that transfer factors are “not species specific” and developed a unique, patented molecular technology that makes it possible to isolate or separate transfer factors from the cow and chicken, who have heroic immune systems.

A calf can consume only 25% of the colostrum from the mother cow. So in the first 16 hours, when there is an abundance of transfer factors, the other 75% (which was previously often wasted) is now harvested by 4Life Research for extracting the transfer factors, which are then concentrated in a proprietary way.

This delivers the exact same transfer factors that we already have inside of us. Meaning there is nothing left relating back to the cow.

In 2006 4Life Research Founder David Lisonbee received the I.N. Blokhina Award for “excellence in the field of immune sciences”. And 4Life now has 40 patents worldwide.

Created by Nature and Proven by Science The Benefits of Taking Transfer Factor

Benefit 1.

Transfer Factor creates an immune response in your body, waking up your immune system, and increasing your immunity.

Our immune systems may get run-down and lazy due to stress, poor nutrition, and ageing.

Transfer Factor supports the fitness and optimal function of our immune systems.

Benefit 2.

4Life's Transfer Factor Tri-Factor Formula contains a patented technology called NanoFactor™ which helps regulate the immune system.

Like a thermostat that regulates - it knows when to turn on and when to turn off...

It's this naturally wise intuition that balances our immune systems - when to turn on, when to turn off, and calm down, like in over-active, inflammatory or auto-immune situations.

Benefit 3.

1. Recognize the enemy
2. Respond by eliminating it
3. Remember it for next time

It's like having millions of "Wanted Posters" in our body, educating our immune systems to recognize hostile invaders, respond with an attack and then remember, so an immediate and very effective response occurs next time.

"The future of medicine will necessarily concentrate on our natural defence – our immune systems. And 4Life Transfer Factor Plus is the ultimate immune system product."

- Dr Rob Robertson, Jr., MD, Former Emergency Room Physician

"For unparalleled immune support and longevity, 4Life Transfer Factor is the lynchpin. It is nothing less than an amazing natural compound and should be used by people of all ages."

- Dr Duane E. Townsend, MD., Oncology

Some Third Party Scientific Studies and Publications on 4Life Transfer Factor

Fortify Your Defenses!

A preliminary scientific test suggests that 4Life Transfer Factor® Tri-Factor® Formula strengthens your immune system (measured by increasing the number of protective IgA antibodies).
Shown in **100%** of people tested.

Saliva is part of our first line of defence.

100% of the people tested, increased the number of protective IgA antibodies by 73% more, after taking 4Life Transfer Factor for 4 consecutive weeks.

Increases Immune Cell Effectiveness:

Our Natural Killer Cells are our front line troops that help keep us well.

These results were obtained from studies on NK Cells conducted by the head of immunology at the Russian Academy of Medical Science.

4Life Transfer Factor up to 437% increase in immune cell effectiveness

Approved by Russian government in 2004.

4Life Transfer Factor®

Listed in the Physicians' Desk Reference

"For over 60 years, the Physicians' Desk Reference has been the definitive source for unbiased research on drugs and supplements."

In the PDR since early 2000's, and distributed to more than 500,000 doctors in the United States.

"People throughout the world are reaping the benefits of improved health and immune system function from these amazing Transfer Factor molecules."

- Dr Richard Bennett, Ph.D. Infectious Disease Microbiologist & Immunologist

Over 4000 clinical studies, \$40million in research and hundreds of scientific studies. Other publications and journals include: Nutrition & Metabolism; Applied Physiology, Nutrition and Metabolism; Journal of the International Society of Sports Nutrition; Medicine & Science in Sport & Exercise.

Multiple Ways to Enjoy the Benefits of Transfer Factor - Nature's First Supplement

capsules, chewable tablets, juice, spray, gel, powders, protein shakes, topical products

plus Targeted Transfer Factors with focused natural support for specific body systems

glucose balance
brain acuity
male organs

vision
cardiovascular
female organs

and Fortify nutritious meal packs with rice, lentils, beans, vitamins, minerals and Transfer Factor, for donation to help feed hungry children around the world.

"It seldom happens that one scientific discovery can bring such huge benefits to support the health of every human being. I firmly believe that 4Life Transfer Factor products hold the secret to optimal immune function."

- Teresa Tomalska, MD

A few of the TEAM 4Life members - a group of world-renowned elite, professional or Olympic athletes who also enjoy using 4Life products as part of their training regime.
